

## K2 Keymatic Tubular Keys

In the retail industry, opening a showcase has always been a matter of putting the key in the lock and pulling the door or drawer open with the key. Keys and locks were never designed to be used this way. That is until now! We designed our product to accommodate how people actually use their keys. With our new **K2** Keymatic Pull Line of locks you still have the same great features of eight locks for the price of one. However, this specially tooled key interlocks with the face of the lock. Now you can use the key without the risk of damaging the keys or the lock.

Customers now have the option to color code the keys by department or lock setting (1 to 8).

The **Red Change Tool** is stamped with the same code as the operating key, except the setting code is 0.

### Item Number

To determine your item number enter the **RED** option code for each section as in the example below.

#### A Item

**KEY** Key

#### B Core Type

**K2** K<sup>2</sup> Keymatic

#### C Operating Key No.
