

Disc Tumbler B Controlled Keys

Since the beginning of 2007, our Disc Tumbler **B** (Kenstan B) keyway was made standard product offering. The **B** Keyway severely limits unauthorized key duplication since key blanks are never sold. Cut keys can only be ordered through the Kenstan factory. All new lock orders **without** keying specifications or specified key numbers will be assembled with the **B** keyway components and keys. To easily identify **B** keyway locks a “B” is marked on the Core face. Keys are sold separately from the locks.

Disc Tumbler “54G” Keys.

In an effort to minimize key proliferation, Kenstan does not include keys with **D** (54G) keyway locks. All keys must be ordered separately.

Kenstan recommends the purchase of our factory original keys to ensure smooth lock operation. Use of non-Kenstan copy keys will void the Kenstan Warranty on our locks.

Kenstan Control Keys are used to remove and replace the cores on Removable Core locks.

Item Number

To determine your item number enter the **RED** option code for each section as in the example below.

A Item
KEY Key

B Core Type
D Disc Tumbler
B Controlled Keyway

C Key Function
O Operating
M Master
C Control
CM Master Control
